RETROFIT YOUR MACHINE

Convert your GVA or HiPerSet to the latest technical standards and get an exclusive discount when ordering one or more of the following retrofits directly at our booth during ITMA:

HiPerSet Retrofits

- New vertical coiler V3
- Air circulation upgrade to 7,5 kW motor
- Independent dent sensor on creel
- Three-deck yarn path
- Second belt motor

GVA Retrofits

- New **TwinAccu Vs. II**
- Independent dent sensor on creel
- Yarn suction at entry and exit
- Sealed TRB steam channels
- Clean-Air-Cooling

Electrical Conversions for GVA and HiPerSet

Electronic components follow a specific product lifecycle. Now and again, discontinued components unfortunately need to be replaced such as the PLC system, inverter system or Falsetwist motor drive. To support you best possible, we provide individual electrical retrofits for your machine upon request.

Pssst...

Do you already know our new refurbishment & repair program? Visit us at ITMA and find out about our various Customer Support Services.
