OPEN HOUSE

NOVEMBER 13th, 2025

9:00 am - 16:00 pm

Biella, Italy

Since April 2025, our Steamatic inline-steaming unit has been running successfully at Tintalana Srl. in Biella, Italy.

Now it's time for you to experience the Steamatic live too! Take this opportunity to join us at our Open House event.

Plenty of highlights are awaiting you:

Meet and greet
with the PHS Team (Technical & Sales)

Live and in action
Presentation of the Steamatic

Q & A at an informal get-together

Enjoy Bavarian beer, Italian coffee, and other delicacies while finding out more about PHS and our Steamatic.

13866 Masserano (Biella), Italy

THE STEAMATIC

The Steamatic is a compact inline-steaming unit between ring spinning and winding machine. Developed by Power-Heat-Set in Germany, it focuses on customers in the worsted yarn industry, increasing the efficiency of your daily production.

The Steamatic not only eliminates the need for autovlace steaming but achieves stable steaming results for any type of used yarn. Due to the vacuum in the steam dome, the steam reaches the yarn not only on the surface, but also penetrates it between the fibers – this means optimal steaming results, without any damage to the yarn and a more uniform steam and heat penetration.
